Description

These functional active ingredients are able to carry out an intense regenerating and compacting support activity. Coenzyme Q10 has an antioxidant and anti-aging action, as it counteracts the effect of free radicals and regenerates vitamin E; but what makes the product unique and effective is the snail slime extract, known and appreciated for its properties, rich in mucopolysaccharides that guarantee elasticity to the skin, while it is nourished, hydrated and exfoliated. It is also enriched with hyaluronic acid, collagen, aloe and vitamin E.

Daily use allows the eye contour to be more hydrated, firmer, visibly brighter, reducing wrinkles and unsightly "crow's feet", swelling and bags.

How to use: Apply morning and evening to the eye area with gentle and light movements.
