Description
Ischia is an island full of scents, the air that is breathed by sensations of well-being and relaxation to which the islanders are accustomed and miss it when they are far from this paradise. Those who arrive on the island immediately notice the presence of this air rich in mixtures of essences, with the scent of lemons, bergamot, mandarin, orange blossom, mixed with the scent of the sea, flowers and aromatic plants. The nature of the island gives us these scented notes to create a line of Eau de Toilette.
